Modernize HR Systems of Record
for an Improved Employee Experience

Empower Your Mobile Workforce

In our increasingly connected world, 24/7 availability and access to information is expected. Employees expect on-the-go mobile access to applications and data. Managers need to be able to engage their workforce from anywhere. Executives need to be empowered with anytime access to their key performance indicators to drive better decision-making. And HR teams need to compete for talent more efficiently with modern onboarding and training solutions. In order for businesses to compete in today's digital world, it is imperative that companies support an agile and productive workforce, empowering them with modern, intuitive and intelligent apps and workflows.

HR Modernization Challenges

HR systems need to be consumer-simple to meet the rapidly evolving business environments. However, common HR enterprise systems such as SAP, PeopleSoft, Oracle and ADP are plagued with aging, complex and confusing processes that are unable to meet the modern needs of today's workforce. These systems are complex to navigate, desktop strapped, lack a simplified and common user interface and typically require users to navigating multiple systems to complete one task. This lack of usability leads to low adoption and high frustration by employees and HR departments.

The PowWow Mobile Solution

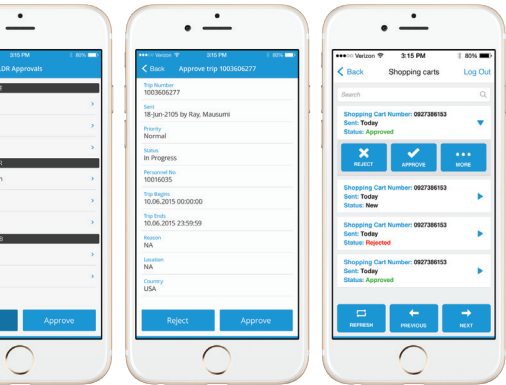

PowWow Mobile is redefining the mobile enterprise. Our SmartUX Platform simplifies and extends business apps to mobile, delivering new and intelligent omni-channel experiences that empower employees with actionable insights wherever they are and whenever they need it. Our high-productivity platform empowers citizen developers with a self-service, drag and drop, composite environment that allows users to easily create modern app experiences or leverage our pre-built templates for the ultimate in speed and re-usability, that easily connect to any enterprise or cloud data source, with or without APIs and securely deliver hybrid apps to virtually any device.

Why PowWow Mobile

Transform Systems of Record

Transform systems of record into systems of engagement by creating more sophisticated, intuitive and simplified user interactions that leverage and extend existing investments in applications, data, logic, rules and integrations, with or without APIs or having to alter the source code.

Unified Solution

One unified solution for all your HR Systems - Peoplesoft, ADP, Workday, Oracle, Custom-Built, or any 3rd-party data source, API or SQL. Provide employees, contractors, managers and HR teams with modern and intuitive apps that support all their workflows and applications.

Accelerate Time to Market

Accelerate time to market with pre-built apps for all common HR use cases. Get started with quick mobile wins for your organization while ensuring design consistency across all mobile apps, resulting in increased adoption and compliance.

Open & Extensible

Mitigate risk, avoid vendor lock-in and protect your investments with a platform built on best of breed modern and open frameworks (Cordova, Ionics and AngularJS). SmartUX's pluggable platform architecture allows you to leverage open source standards for unparalleled extensibility.

End-to-End Secure

With SmartUX, preserve and enhance existing application authentication mechanisms, leverage existing user credentials and ensuring no data at rest. Readily integrates with all leading EMM platforms for 1-click publishing to enterprise app stores.
